P6 — GitHub Repository & Collaboration Setup

Evidence: Project Boards, Issues, Branches, Pull Requests, Merge Conflicts and CI

PROJECT BOARDS

Three Boards, One Per Team Member

Chads Tasks, Brians tasks and Modise tasks — each tracking that person's assigned rubric items.

PROJECT BOARDS

Individual Task Boards

Chad's Tasks

Brian's Tasks

Modise's Tasks

Each board shows Todo / In Progress / Done columns with that person's assigned issues.

ISSUES

Issues Created and Assigned

13 open issues covering coding, design and documentation tasks, each with an assignee.

BRANCHES

Feature Branches Per Team Member

main is the default/protected branch. Chad, Brian and Modise each have their own active feature branch.

WORKING IN A BRANCH

Committing and Pushing to a Feature Branch

```

 create mode 100644 package-lock.json
 create mode 100644 package.json
 create mode 100644 prototype.html

00017520000ng05 H100004 ~/Javascript-project-2026 (Chad)
* $ git status
On branch Chad
Your branch is ahead of 'origin/Chad' by 4 commits.
(use "git push" to publish your local commits)

Changes not staged for commit:
  (use "git add <file>..." to update what will be committed)
  (use "git restore <file>..." to discard changes in working directory)
        modified:   file.js

no changes added to commit (use "git add" and/or "git commit -a")

00017520000ng05 H100004 ~/Javascript-project-2026 (Chad)
* $ git add .

00017520000ng05 H100004 ~/Javascript-project-2026 (Chad)
* $ git commit -m "added the figma link into the readme"
[Chad 7825] added the figma link into the readme
1 file changed, 1 insertion(+), 2 deletions(-)

00017520000ng05 H100004 ~/Javascript-project-2026 (Chad)
* $ git push origin Chad
Enumerating objects: 1, done.
Counting objects: 100% (5/5), done.
Delta compression using up to 66 threads
Compressing objects: 100% (3/3), done.
```

On branch Chad: pulling main, staging, committing ("added the figma link into the readme"), and pushing to origin/Chad.

WORKING IN A BRANCH

Branch Kept in Sync with Origin

```
0605175260088@RDS MINGW64 ~/Javascript-project-2026 (Chad)
• $ git status
On branch Chad
Your branch is ahead of 'origin/Chad' by 5 commits.
  (use "git push" to publish your local commits)

nothing to commit, working tree clean

0605175260088@RDS MINGW64 ~/Javascript-project-2026 (Chad)
• $ git push
Enumerating objects: 4, done.
Counting objects: 100% (4/4), done.
Delta compression using up to 60 threads
Compressing objects: 100% (2/2), done.
Writing objects: 100% (2/2), 300 bytes | 150.00 KiB/s, done.
Total 2 (delta 1), reused 0 (delta 0), pack-reused 0 (from 0)
remote: Resolving deltas: 100% (1/1), completed with 1 local object.
To github.com:ChadT2025/Javascript-project-2026.git
   ca17587..e4870b1  Chad -> Chad

0605175260088@RDS MINGW64 ~/Javascript-project-2026 (Chad)
• $ git status
On branch Chad
Your branch is up to date with 'origin/Chad'.

nothing to commit, working tree clean

0605175260088@RDS MINGW64 ~/Javascript-project-2026 (Chad)
• $ git checkout main
Switched to branch 'main'
Your branch is up to date with 'origin/main'.

0605175260088@RDS MINGW64 ~/Javascript-project-2026 (main)
• $ git status
On branch main
Your branch is up to date with 'origin/main'.

nothing to commit, working tree clean
```

git status confirms the branch is ahead, then clean and up to date with origin/Chad after pushing.

PULL REQUEST

Pull Request Ready to Merge

The screenshot shows a GitHub Pull Request interface for a repository named 'javascript-project-zuko'. The pull request is titled 'added the figma link into the readme #17' and is in the 'Ready to merge' state. The pull request was created by ChadT2025, who wants to merge 1 commit into the 'main' branch from the 'Chad' branch. The pull request has 1 commit, 0 checks, and 1 file changed. The commit message is 'added the figma link into the readme' with a commit hash of 73c4aca. The pull request was closed by ChadT2025 and then reopened. A collaborator, KABOMOD, has approved the pull request with the comment 'thank you i approve it'. The pull request has no conflicts with the base branch, and merging can be performed automatically. The pull request is ready to be merged, and the 'Merge pull request' button is visible. The right sidebar shows the 'Reviews' section with 'No reviews' and a 'Convert to draft' button. The 'Assignees' section shows 'No one—assign yourself'. The 'Labels' section shows 'None yet'. The 'Projects' section shows 'None yet'. The 'Milestone' section shows 'No milestone'. The 'Development' section shows 'Successfully merging this pull request may close these issues.' and 'None yet'. The 'Notifications' section shows 'Unsubscribe' and 'You're receiving notifications because you modified the open/close state.'

added the figma link into the readme #17

git merge main fails to auto-merge README.md — Git inserts conflict markers (<<<<<< HEAD / ===== / >>>>>> main) for manual resolution.

MERGE CONFLICT

Conflict Resolved in VS Code

Using VS Code's merge editor to compare incoming vs. current changes and produce the resolved result before committing.

GitHub Actions — Lint Check Passing

Every step of the Lint Check workflow (checkout, install, ESLint) succeeds on push.

I IDE & Toolkit Configuration

Criterion 5 • 6 Marks

Evidence that the development environment — linter, formatter, and debugger — is configured and working, for the SkillsTrack Learner Support Portal.

LINTER

ESLint — installed and catching real errors

```
PS C:\Users\chadt\Javascript-project-2026> npx eslint --init
eslint@10.8.1
Ok to proceed? (y) y
You can also run this command directly using 'npm init @eslint/config@latest'.

> javascript-project-2026@1.0.0 npx
> create-config

@eslint/create-config: v2.0.0
✓ What do you want to lint? · javascript
✓ How would you like to use ESLint? · problems
✓ What type of modules does your project use? · esm

4
```

After save — auto-formatted

DEBUGGER

VS Code debugger — breakpoint working

Execution paused at a breakpoint in `add()` — Variables panel shows `a = 5`, `b = 10`

ENVIRONMENT

VS Code setup and project structure

Extensions: ESLint, Prettier, Live Server installed

Project file structure in the Explorer panel

npm init -y — project initialised

CRITERION 7

Syntax & Disciplined Coding Style

Evidence from Prototype_Tasks_Page • Consistent formatting, meaningful naming, linting, and organised files

Worth 6 marks — assessed throughout the codebase, not a single deliverable

ORGANISED INTO SENSIBLE FILES & FOLDERS

Project structure at a glance

Root project folder — config, source, and docs kept separate and named clearly

Prototype_Tasks_Page grouped into its own folder alongside the wider repo

STYLE RULES DEFINED, NOT IMPROVISED

Formatter & linter configuration

.prettierrc — shared formatting rules: quotes, semicolons, tab width, line length

eslint.config.mjs — enforces no-var, prefer-const, eqeqeq, camelCase and flags unused vars

Meaningful names, comments, and consistent style in practice

```
JS prototype.js X package.json JS eslint.config.mjs .prettierrc
Prototype_Tasks_Page > JS prototype.js > renderTasks > tasks.forEach() callback
1 // Array to store all tasks
2 let tasks = [];
3
4 // Grab the form, input box, and list from the page
5 const taskForm = document.getElementById("taskForm");
6 const taskInput = document.getElementById("taskInput");
7 const taskList = document.getElementById("taskList");
8
9 // Draws all tasks onto the page
10 function renderTasks() {
11   // Clear the list before redrawing it
12   taskList.innerHTML = "";
13
14   tasks.forEach(function (task) {
15     // Create a list item for this task
16     const li = document.createElement("li");
17     if (task.completed) {
18       li.classList.add("completed"); // style it if done
19     }
20
21     // Text showing the task title
22     const span = document.createElement("span");
23     span.textContent = task.title;
24
25     // Container to hold the buttons
26     const buttonGroup = document.createElement("div");
27
28     // Button to mark task complete/undo
29     const completeBtn = document.createElement("button");
30     completeBtn.textContent = task.completed ? "Undo" : "Complete";
31     completeBtn.addEventListener("click", function () {
32       task.completed = !task.completed; // flip completed status
33       renderTasks(); // redraw list with updated status
34     });
35
```

`renderTasks()` — descriptive names (`taskList`, `completeBtn`) and a comment ahead of each step

```
const deleteBtn = document.createElement("button");
deleteBtn.textContent = "Delete";
deleteBtn.addEventListener("click", function () {
  // Keep every task except the one that was clicked
  tasks = tasks.filter(function (t) {
    return t.id !== task.id;
  });
  renderTasks(); // redraw list without the deleted task
});

// Put buttons into their container
buttonGroup.appendChild(completeBtn);
buttonGroup.appendChild(deleteBtn);

// Put text and buttons into the list item
li.appendChild(span);
li.appendChild(buttonGroup);

// Add the finished list item to the page
taskList.appendChild(li);
});

Runs when the form is submitted ( (local function)(this: HTML
taskForm.addEventListener("submit", function (event) {
  event.preventDefault(); // stop page from refreshing

  const title = taskInput.value.trim();
  if (title === "") return; // ignore empty input

  // Add the new task to the array
  tasks.push({
    id: Date.now(), // unique id based on current time
    title: title,
    completed: false,
  });
});
```

Delete & submit handlers — same 2-space, semicolon-consistent style throughout

FORMATTER RUN BEFORE SUBMITTING

Prettier check → write, applied to every file

The screenshot shows a Visual Studio Code window with a terminal open. The Explorer sidebar on the left shows a project named 'JAVASCRIPT-PROJECT-2026' with files like .github, .gitignore, .prettierrc, eslint.config.mjs, file.js, index.html, LICENSE, package-lock.json, package.json, prototype.html, and README.md. The terminal shows the following commands and output:

```
PS C:\Users\0605175260088\Javascript-project-2026> .\eslint.config.mjs
PS C:\Users\0605175260088\Javascript-project-2026> cat package.json
{
  "name": "javascript-project-2026",
  "version": "1.0.0",
  "description": "A JavaScript + Firebase learner support portal for managing tasks, bookings, and progress tracking – built as a team project for the NSSA JavaScript Programmer Skills Programme (SP-228 373).",
  "main": "index.js",
  "scripts": {
    "test": "echo \"Error: no test specified\" && exit 1"
  },

    "globals": "^17.9.0"
  }
}

PS C:\Users\0605175260088\Javascript-project-2026> npx prettier --check .
Need to install the following packages:
prettier@3.9.6
Ok to proceed? (y) y

Checking formatting...
[warn] .github/workflows/lint.yml
[warn] eslint.config.mjs
[warn] file.js
[warn] index.html
[warn] package-lock.json
[warn] package.json
[warn] README.md
[warn] Code style issues found in 7 files. Run Prettier with --write to fix.

PS C:\Users\0605175260088\Javascript-project-2026> npx prettier --write .
.github/workflows/lint.yml 35ms
.prettierrc 56ms (unchanged)
eslint.config.mjs 21ms
file.js 15ms
index.html 18ms
package-lock.json 53ms
package.json 11ms
prototype.html 4ms (unchanged)
README.md 225ms
```

npx prettier --check flags 7 files, npx prettier --write brings all of them into line with the shared style

STYLE CHECKS BUILT INTO THE WORKFLOW

package.json lint & format scripts

The screenshot shows the Visual Studio Code editor interface. The Explorer panel on the left displays the project structure for 'JAVASCRIPT-PROJECT-2026', with 'package.json' selected. The main editor area shows the content of 'package.json' with the following JSON structure:

```
1 {
2   "name": "javascript-project-2026",
3   "version": "1.0.0",
4   "description": "A JavaScript + Firebase learner support portal for managing tasks, bookings, and progress tracking – built as a team project for the M",
5   "main": "index.js",
6   "scripts": {
7     "test": "echo \\\"Error: no test specified\\\" && exit 1",
8     "lint": "eslint .",
9     "format": "prettier --write ."
10  },
11  "repository": {
12    "type": "git",
13    "url": "git+https://github.com/ChadT2025/Javascript-project-2026.git"
14  },
15  "keywords": [],
16  "author": "",
17  "license": "ISC",
18  "type": "commonjs",
19  "bugs": {
20    "url": "https://github.com/ChadT2025/Javascript-project-2026/issues"
21  },
22  "homepage": "https://github.com/ChadT2025/Javascript-project-2026#readme",
23  "devDependencies": {
24    "@eslint/js": "^10.0.1",
```

"lint": "eslint ." and "format": "prettier --write ." — one command applies the standard every time

LINTER ENFORCING THE STANDARD

Catching a style violation — and fixing it

BEFORE

The image shows a VS Code editor window with a JavaScript file named `prototype.js`. The code defines an array `tasks` using `var` and includes a `renderTasks` function. The terminal at the bottom shows the command `npm run lint` being executed, which results in an ESLint error: `Unexpected var, use let or const instead`. The error message also indicates that the issue is potentially fixable with the `--fix` option.

```
1 // Array to store all tasks
2 var tasks = [];
3
4 // Grab the form, input box, and list from the page
5 const taskForm = document.getElementById("taskForm");
6 const taskInput = document.getElementById("taskInput");
7 const taskList = document.getElementById("taskList");
8
9 // Draws all tasks onto the page
10 function renderTasks() {
11   // Clear the list before redrawing it
12   taskList.innerHTML = "";
13
14   tasks.forEach(function (task) {
15     // Create a list item for this task
16     const li = document.createElement("li");
17     if (task.completed) {
18       li.classList.add("completed"); // style it if done
19     }
20
21     // Text showing the task title
22     const span = document.createElement("span");
23     span.textContent = task.title;
24
25     // Container to hold the buttons
```

```
PS C:\Users\0605175260088\Javascript-project-2026> npm run lint
> javascript-project-2026@1.0.0 lint
> eslint .

C:\Users\0605175260088\Javascript-project-2026\Prototype_Tasks_Page\prototype.js
  2:1  error  Unexpected var, use let or const instead  no-var

✖ 1 problem (1 error, 0 warnings)
1 error and 0 warnings potentially fixable with the '--fix' option.
```

ESLint flags “Unexpected var, use let or const instead” (no-var rule)

AFTER

The image shows the same VS Code editor window after the code has been fixed. The `var` has been replaced with `let`. The terminal now shows a clean output with no errors or warnings, indicating that the linting process passed successfully.

```
1 // Array to store all tasks
2 let tasks = [];
3
4 // Grab the form, input box, and list from the page
5 const taskForm = document.getElementById("taskForm");
6 const taskInput = document.getElementById("taskInput");
7 const taskList = document.getElementById("taskList");
8
9 // Draws all tasks onto the page
10 function renderTasks() {
11   // Clear the list before redrawing it
12   taskList.innerHTML = "";
13
14   tasks.forEach(function (task) {
15     // Create a list item for this task
16     const li = document.createElement("li");
17     if (task.completed) {
18       li.classList.add("completed"); // style it if done
19     }
20
21     // Text showing the task title
22     const span = document.createElement("span");
23     span.textContent = task.title;
24
25     // Container to hold the buttons
```

```
PS C:\Users\0605175260088\Javascript-project-2026> npm run lint
> javascript-project-2026@1.0.0 lint
> eslint .

PS C:\Users\0605175260088\Javascript-project-2026>
```

`var` replaced with `let`, lint re-run clean — no errors or warnings
